

## **LSF Summer Camp Health & Safety Plan**

This plan was developed in accordance with the [CDC's guidance for Youth and Summer Camps](#). It will be reviewed as additional guidance becomes available.

During Lancaster County's Yellow Phase, the Science Factory will be open for summer camps only. Access to the 17,000 square foot facility will be limited to a small number of campers, staff, and volunteers. Public access will be possible during the Green Phase.

Camps will adhere to the following health and safety procedures:

- **Safe curbside check-in and temperature checks** – You'll be met in our Loading Zone by a clearly identified LSF staff member in a red lab jacket. No need to get out of the car or come inside. Your child will be escorted safely into the building. All campers and staff will have their temperature checked before entering the facility with an infrared no-touch forehead thermometer. Anyone with a temperature of 100.4<sup>0</sup> or above will be sent home.
- **Reduced camp sizes to accommodate physical distancing requirements** – Camps will be capped at 12 students. Social distancing really means PHYSICAL distancing of at least 6 feet. We will provide a place for your child to have social interaction in a safe way. All campers will have their own space and materials which will be sanitized after each use. Campers will have the opportunity to explore the exhibits in the expansive Hall of Science under supervision.
- **Rigorous cleaning and disinfecting procedures** – We are going above and beyond our normal cleaning routines in the classrooms and in the exhibit hall. The Lancaster Science Factory uses commercial cleaning products provided by Cintas.
- **Hand washing breaks and extra hand sanitizer** – We're fully stocked with sanitizer that contains at least 60% alcohol throughout the facility. All campers will be encouraged to wash their hands regularly and as needed.
- **Compliance with all mask wearing requirements** – All campers, staff, and volunteers will be required to wear a mask that covers their nose and mouth. Campers should plan to bring their own cloth mask that they are comfortable wearing during camp. [CDC Mask Guidelines can be found here.](#)
- **Clean and ample personal space for full-day campers having lunch** – Campers staying all day for programs running from 9:00 am – 4:00 pm can bring their own lunch and water bottles. Campers will have plenty of space for physical distancing while eating. All campers' personal belongings will be kept separated in their own areas.
